

Inspection Report Item 28: Toxic Substances Properly Identified, Stored and Used

FDA Food Code References: 3-202.12, 3-302.14, 7-101.11

TOXIC ITEMS

- Toxic items are required to be stored separately from food and food contact surfaces.
 - This includes chemicals used for cleaning, lubricants, bug spray, medicine, first aid supplies, and other personal care items properly identified, stored, and used
- Bug spray must be approved for use in food establishments according to the label and applied according to label directions.
- Toxic items, such as spray bottles, are required to be labeled with the common name of the product.
- Toxic items offered for sale in a retail setting must be stored away from food.
